- ▶ Fully automatic computerized dispatch and receiving station
- ▶ Soft landing feature for smooth operation
- ▶ Large, background-lighted display for multilingual, plain text information
- ▶ Well-engineered mechanism for highest reliability
- ▶ Proximity scanning of positions and carrier movement

Appliance dimensions

MECHANICAL FEATURES

- ▶ robust and simple mechanism with “soft drive” by v-belts for safe and reliable operation
- ▶ proximity scanning of positions and carrier movement
- ▶ self-adjusting, maintenance-free gaskets
- ▶ reliable, low-noise carrier braking by means of integrated bypass
- ▶ no loss of air at the station
- ▶ straight passage

The station is designed as a fully automatic dispatch and receiving unit and can be used as a pass-through and end station.

The conveying direction of the carrier is set through an external blower station, which switches between compression or a vacuum.

For smooth operation arriving carriers are gently stopped by air cushion and automatically released into the basket below.

The operation is done menu-controlled by a membrane keyboard and a plain text display. Multilingual menu, status indication, individually programmable destination numbers and addresses, a search key and list of addresses ensure convenient handling.

Continuous monitoring and documentation of the system status and movement in the systems guarantee safe and reliable operation.

MAIN FEATURES IN SHORT

- ▶ fully automatic sending and receiving station with top load dispatch
- ▶ large, background-lighted display, multilingual menu
- ▶ destination forwarding
- ▶ multi-destination selection with arrival signal
- ▶ for each station system status indication

TECHNICAL DETAILS
