

EASY TOUCH – HOSPITAL – STATION RECESSED END STATION

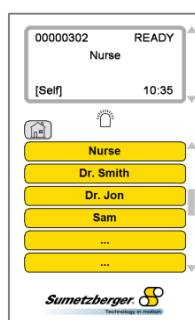

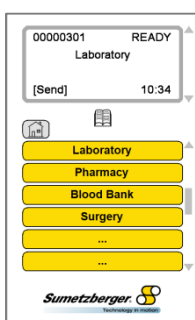

STATION FEATURES

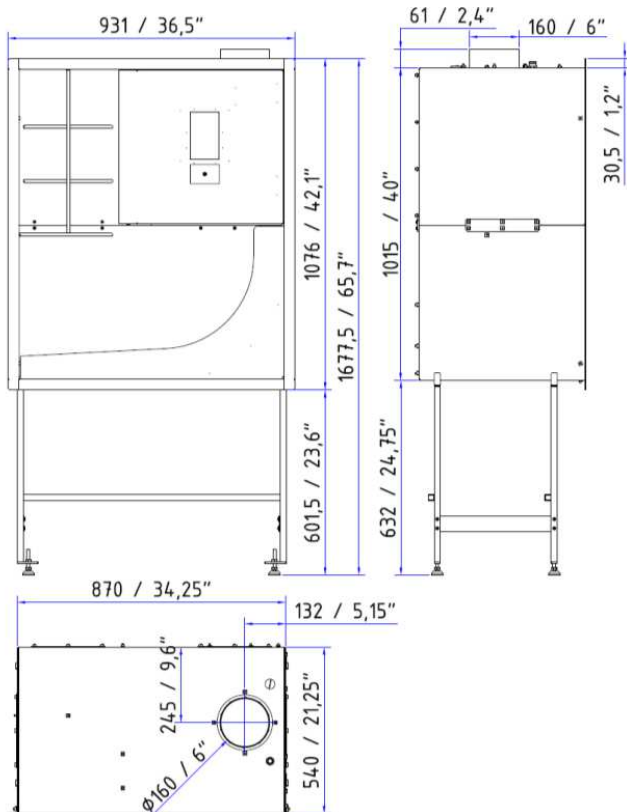

- > Fully automated hospital dispatch and receiving station
- > Wall recessed installation for perfect architectural integration
- > Air cushioned arrival with soft drop slide for carriers
- > RFID carrier and user identification reader
- > Secured Receive to limit access for rated goods

EASY TOUCH OPERATIONAL FEATURES

- > 7" touch display with multifunctional operation screens
- > Touch panel operation via finger, safety gloves or styluses
- > Individual programmable user profiles and customized hotkeys
- > Individual authorization levels for personalized users profiles
- > Touch screen surface protection for easy cleaning

The station is designed as a fully automatic up sent, down receive dispatch and receiving unit.

For smooth operation arriving carriers are gently stopped by air cushion and automatically released via soft drop slide.

The operation is done menu-controlled by the **EASY TOUCH** - the user friendly high resolution 7" fully colored interactive touchscreen GUI with personalized multiple screen operation. Free language selection, customized profiles, status indication, individually programmable destination hot keys, search key, address book query and messaging client ensure user friendly handling.

Continuous monitoring and documentation of the system status and movement in the system guarantee safe and reliable operation.

MAIN FEATURES IN SHORT
